

Design Patent No. 327572

The ultimate in low maintenance roller mills

Running two motors and gearboxes, eliminating chain, pulleys, v.belts and exposed gears, therefore eliminating much of the maintenance required in regular roller mills.

Features:-

- Spring loaded rollers
- Heavy duty gearboxes
- Heavy duty bearing assembly
- Rare earth magnets to help remove metallic objects
- Hardened grooved rollers
- Heavy duty galvanized frame
- No chains, sprockets or v. belts
- Optional differential drive using electronic inverter technology
- Roller speed can be altered to enhance milling of small grains
